

IDNs under .pl – registration rules,
IETF, November 2004

Andrzej.Bartosiewicz@NASK.pl

Internationalized Domain Names in Poland

- First Come, First Served method,
- No pre-registrations,
- No „sunrise” period,
- ACE version only for input, output, processing,
- NASK accepts only valid ACE strings according to RFC 3490, 3491, 3492,
- “xn--” is the only accepted prefix for ACE domain names,
- No special rules for ACE domain names,
- A combination of characters from different character sets is not allowed
- No variants,
- No bundling,
- No association with languages –
- no “language tags”,

Internationalized Domain Names in Poland

- No changes to internal databases, protocols (EPP), invoicing, procedures, customer care etc.
- No extensions to EPP
- „xn—” domain name is the subject of the contract,
- Transparency:
 - The IDN registration rules are publicly available as NASK’s IETF Internet Draft <http://www.bartosiewicz.pl/draft-bartosiewicz-idn-pltld-07.txt> (*expired, will be updated just after IETF61*)
 - Technical part of Registry-Registrar agreement refers to the IETF documents including RFCs and the NASK’s drafts <http://www.ietf.org/internet-drafts/draft-zygmuntowicz-epp-pltld-03.txt> , as the best source of the up-to-date information.
- No changes to Arbitration Court’s procedures etc.
